

Small Group Activity: Is This Normal?

The following child is in your program. Read the description and decide “what you would do?” to support this child in your program. As a group decide if the child’s behavior is normal or in need of further assessment. Write down the steps that you would take to support this child. Chose one member of your group to present a brief description of your child and your plan to the class.

Lindsay:

Lindsey is a two year old child that has entered your program this September. She seems to have very limited speech and language skills. She is able to communicate using gestures to get her needs met. She can be heard occasionally repeating words after others. During storytime she seems to get distracted very easily. She can be observed pulling at her ears throughout the day. Lindsey is absent frequently. **What should you do?**

Use the space below to record your plan.
